MC1/SHOCK-WE

Two technologies for doors and windows

Secure perimeter protection alerting anyone to the opening or breaking of doors and windows

Two sensors in one, the MC1/SHOCK-WE is built to give users the peace of mind that their windows and doors are secured. Working as a shock sensor, a magnetic contact or both and available in white, brown or anthracite grey, it provides complete flexibility with installations and supreme security to the user, generating an alarm before the burglar has a chance to enter.

EN50131	Grade 2
Environmental class	II
Self-certified	✓
Warranty	2 years

Faster installation, less invasion, upsell opportunities and the same supreme security with two-way wireless technology

- **Different colours available**

Convert the standard white version into brown or anthracite grey with the plastics kits to create the desired look.

- **ABS plastics**

2mm polished finish produces a professional and sleek finish while reducing electrostatic interference.

- **No wires, no fuss**

As the system is fully wireless there is no need to run wiring by lifting floorboards or moving furniture, saving you time and money.

- **One-Push-To-Learn**

A feature in all Enforcer wireless devices that means learning devices onto the system can be done in seconds. A simple one button learning feature for easy installation.

- **Signal Strength Indicators**

Signal Strength Indicators (SSI) in all Enforcer wireless devices allow the positioning of devices during installation, without the need to refer back to the panel.

Beat the burglar with tamper protection

This ensures that maximum security is maintained against accidental or malicious tampering of the system, providing added peace of mind that the system is secure.

Expand the system with an input

Through the MC1/SHOCK-WE an extra input can be added to the security system to add any other device that the installation requires.

Meet the required security standard with Grading options

The MC1/SHOCK-WE is Grade 2 for the superior security any installation needs.
